Reload to refresh your session. The fuel pump relay is mounted in the passenger side foot well area, behind the carpet of the center console just below the radio area. The relay module is located on exactly the opposite location, in the driver side of the console, again below the radio area mounted behind the carpet. My concern at this point would not be so much about the fuel pump not coming on, but that you are not getting injector pulse either. The fuel pump will only power up if RPM signal is detected in the PCM. Similarly, if there is no RPM signal, your injectors will not fire either. If the fuel pump relay is bad, you will still get injector fire just nothing will come out; same goes for the module. I would be focusing on your MFI relay attached to side of fuel pump relay, the associated fuses, and making sure your crank sensor is working. If the crank sensor goes out, you will have no spark, no fuel, and no injector pulse. Similarly if key power lines are down to the PCM via fuse or MFI relay failure, there will be no reference voltages, and therefor no spark, no injector fire If engine is not turning over you will not get Pump only comes on if engine is turning over.

And it doesnt Diagnostic showed Crankshaft position sensor and one I have a 1993 Mitsubishi Eclipse GS. Please refer to CarGurus Terms of Use. The Mitsubishi Eclipse has a great reputation because of its sporty power and fresh styling. As well, the powerful engine of the Mitsubishi Eclipse is a 3.8L, V6 engine and this promises lots of energy and speed on the road. The Mitsubishi Eclipse offers an excellent sound system to enhance road travel. The fine styling and excellent performance make this coupe an excellent car in the city or in the country. With a modern look that is ready to eat up the roads, you want to keep this car in top shape for the best of times. The only way to do that for the Mitsubishi Eclipse is with excellent quality auto parts. Its streamlined looks, efficient performance, and affordable price tag were among the considerations that acclaimed it an immediate sensation. This first model also received attention under its alias, the Eagle Talon, on account of Mitsubishis involvement with Chrysler. When the first generation of the Eclipse premiered, it was outfitted with a base 1.8L SOHC fourcylinder engine that showed off up to 92 horsepower. Initially, the Eclipse was only available as a frontwheel drive vehicle but allwheel drive was added into the lineup during the cars first year on the road. Since its debut, fans have rallied behind the low cost yet unbelievable performance value that has earned the Eclipse the reputation of being one of the most commonly upgraded tuner vehicles in the world. The Second Generation Eclipse pushed performance up a notch and paired it with a body style that was smart and sexy in both stock trim and modified forms.

The turbocharged Eclipses of the first two generations drove the aftermarket to make them one of the most supported sport compact vehicles in the USA. In 2000, when the Third Generation Eclipse was released, it was bigger and more refined, making it more of a touring coupe than the original model. The cars of the Third Generation were manufactured from 2006-2012. Since then, the aftermarket has grown and many styling and bolt on performance and suspension products have become newly available for the sometimes unappreciated Fourth Generation Eclipse. No matter what model you own, you can be sure that PartsGeek has you covered with a broad range of aftermarket upgrade options. You will obtain the best performance and reliability from your Mitsubishi Eclipse by sticking with high quality auto parts for the upgrades, repairs, and maintenance of your vehicle. Due to the tuner friendliness as well as the current market prices for the Mitsubishi Eclipse, many performance parts such as oxygen sensors, clutch kit, strut assembly, shock mounts, and expansion tanks, are readily available at affordable prices. In addition to performance parts that will help increase the power and performance, PartsGeek also carries a full line of Mitsubishi Eclipse suspension upgrades that will help you upgrade the old worn out OEM components with affordable race ready high quality components. Fresh styling and sporty power has earned The Eclipse the high regard of car owners everywhere. With a modern look that is ready to eat up the roads, you will want to keep this car in top shape. The best way to do this is by shopping for excellent quality Mitsubishi Eclipse OEM and Mitsubishi Eclipse aftermarket parts at PartsGeek. It appeared to be a manufacturer part not a rebuilt piece of crap PartsGeek customer service was so helpful and apologetic, they were ready to resend me my missing part. But at the same time I received shipping confirmation. I am a very satisfied customer.
